

Regional Water Reclamation System(s) Information Request Worksheet

Please check the appropriate Water Reclamation System. If more than one System, please complete a separate Worksheet for each System.

- Lakeview Regional Water Reclamation System
- Northeast Regional Water Reclamation System (Riverbend / Doe Branch Plants)
- Peninsula Water Reclamation Plant

Entity Name: _____

Reporting Period (please check only one): **Calendar Year is the preferred reporting period.**

- Calendar Year 2017
- Fiscal Year 2017 Period Begin: _____ Period End: _____

I. Water Reclamation System Information

For this reporting period, enter the amount of wastewater treated (million gallons) for each category.

Customer Category	Number of Connections	Million Gallons (MG) Treated
Residential Single Family		
Residential Multi-Family		
Industrial		
Commercial		
Institutional		
Other, please specify: _____		
Total		

II. Projections

A. Please provide current population (or wastewater connections) for your service area.

Check One	Current (2018)
<input type="checkbox"/> Population	_____
<input type="checkbox"/> Connections	

B. Any new developments (greater than 200 homes) expected in the next 2 to 3 years? If so, please list below and provide an estimated number of homes.

Development	Homes

C. Estimate how much wastewater you expect to be treated by Upper Trinity.

	Current (2018)	Percentage of Total System Needs				
		2019	2020	2021	2022	2023
Estimated Wastewater Treated by UTRWD (%)	_____	_____	_____	_____	_____	_____

III. Other Information

A. Inflow / Infiltration

In our effort to continue monitoring peak inflows into Upper Trinity's wastewater treatment plants, please list any improvements your entity has made during this reporting period to its wastewater collection system (or equipment purchased) to reduce / limit inflow and infiltration.

How would you rank the success of these improvements in reducing / limiting inflow and infiltration?

- Successful
 Somewhat Successful
 Not Successful

B. Direct Reuse for Irrigation Purposes

As an alternative to using treated drinking water, many new developments are incorporating “purple pipe” / direct reuse systems (using treated effluent from water reclamation plants) to irrigate the common-ways and park areas. Is there interest within your entity for using treated effluent for irrigation purposes?

- Yes
 No
 Currently Using Treated Effluent

C. Feedback

In the space below, please give us some feedback. We would appreciate your comments about the services provided to you by Upper Trinity, or suggestions on how Upper Trinity can improve in providing these services.

Thank you for taking time to complete this survey. The information you provided is very important in planning for your long-term water service needs, and for the water needs of this region. If you have any questions or need additional information, please feel free to contact Jason Pierce, Manager of Customer Contracts and Support Services, at 972-219-1228.
